SMART SPACE⁺

别墅门窗定制大师

MASTER OF CUSTOMIZED
VILLA DOORS AND WINDOWS

门窗是别墅室外与内的过渡，优越的采光采景，
能随别墅一起经历风霜雨雪、时光流转，依然焕发光彩，打开亲近自然，阖上远离喧嚣，
门窗的大气沉稳才成为别墅的怡然生活不可缺少的重要部分。

Doors and windows are the transition between the outside and inside of a villa,
providing superior lighting and scenery,
Being able to experience wind, frost, rain, snow, and the flow of time with the villa, still shining brightly,
opening up and getting close to nature, closing away from noise,
and maintaining a calm and dignified atmosphere through doors and windows have become an indispensable
and important part of the peaceful life of the villa.

CHIEF THE WINDOW DESIGNER

科尼亚（中国）首席门窗设计师

欧洲著名建筑设计师，多年从事住宅建筑设计，对现代住宅建筑的门窗功能需求及外观美学有着丰富的配套应用经验，深受德国现代主义建筑文化影响。秉承罗杰·史密斯“极简主义”的设计理念各个细部精简到不可精简的绝对境界它们高贵、雅致已使结构本身升华为建筑艺术为科尼亚门窗提炼出门窗应用“流通空间”新概念旨在实现建筑美学与门窗实用性的高度统一必将奠定中国零售门窗产品的设计新高度

Famous European architectural designer who has been engaged in residential architecture design for many years and is knowledgeable about modern architecture. The functional requirements and aesthetic appearance of doors and windows in residential buildings have rich experience in supporting applications, and are deeply influenced by them. The influence of German modernist architectural culture. Adhering to Roger Smith's minimalism. The design concept has been simplified to an absolute state where each detail cannot be simplified. Nobility and elegance have elevated the structure itself to the level of architectural art, transforming it into Konya doors and windows. Extracting the new concept of "circulation space" for door and window applications aims to achieve architectural aesthetics and practicality of doors and windows. Highly unified will undoubtedly establish a new height in the design of retail door and window products in China.

Roger Smith
罗杰·史密斯

别墅生活 + VILLA LIFE

当生活有了露台，家人的活动空间，也随之延展到了室外晨曦与爱人在的露台上喝一杯早茶；
或与孩子在一方阔景中探索奇妙世界，在春花、夏草、秋叶、冬雪中读懂自然的奥秘，拾取生活温馨瞬间。

When life has a terrace, the family's activity space also extends to the outdoors. At dawn, have a cup of morning tea on the terrace with your loved one. Or explore the wonderful world with children in a vast landscape, in the spring flowers. Understand the mysteries of nature in summer grass, autumn leaves, and winter snow, and pick up the warm moments of life.

极简主义 + MINIMALISM

随着时代的发展，极简主义越发的被人们所喜爱也逐渐成为人们家装的主基调，表达了人们对简单舒适的生活的渴望。
极简设计简约而不简单，简约而不随意，
通过最简单的设计，融入醇熟的设计理念，连接关于生活的点滴打造纯粹且舒适的设计感之家。

With the development of the times, minimalism has become increasingly popular and has gradually become the main theme of home decoration, expressing people's love for simplicity. The desire for a comfortable life. Minimalist design is simple yet not simple, simple yet not casual. Through the simplest design, it incorporates mature design concepts, connects the details of life, and creates a pure and comfortable design home.

BRAND INTRODUCTION

深耕行业 18 年
18 years of deep cultivation in the industry

20 万平方年产能
200000 square meters of annual production capacity

全屋门窗定制系统
Whole house door and window customization system

本公司位于中国铝材之都广东佛山市，公司导入先进门窗系统技术，高端进口设备，资深与专业人才和成熟的管理经验，主要生产和销售中高端宅配产品，公司产品畅销国内，出口非洲、中东、东南亚、欧美等国家。

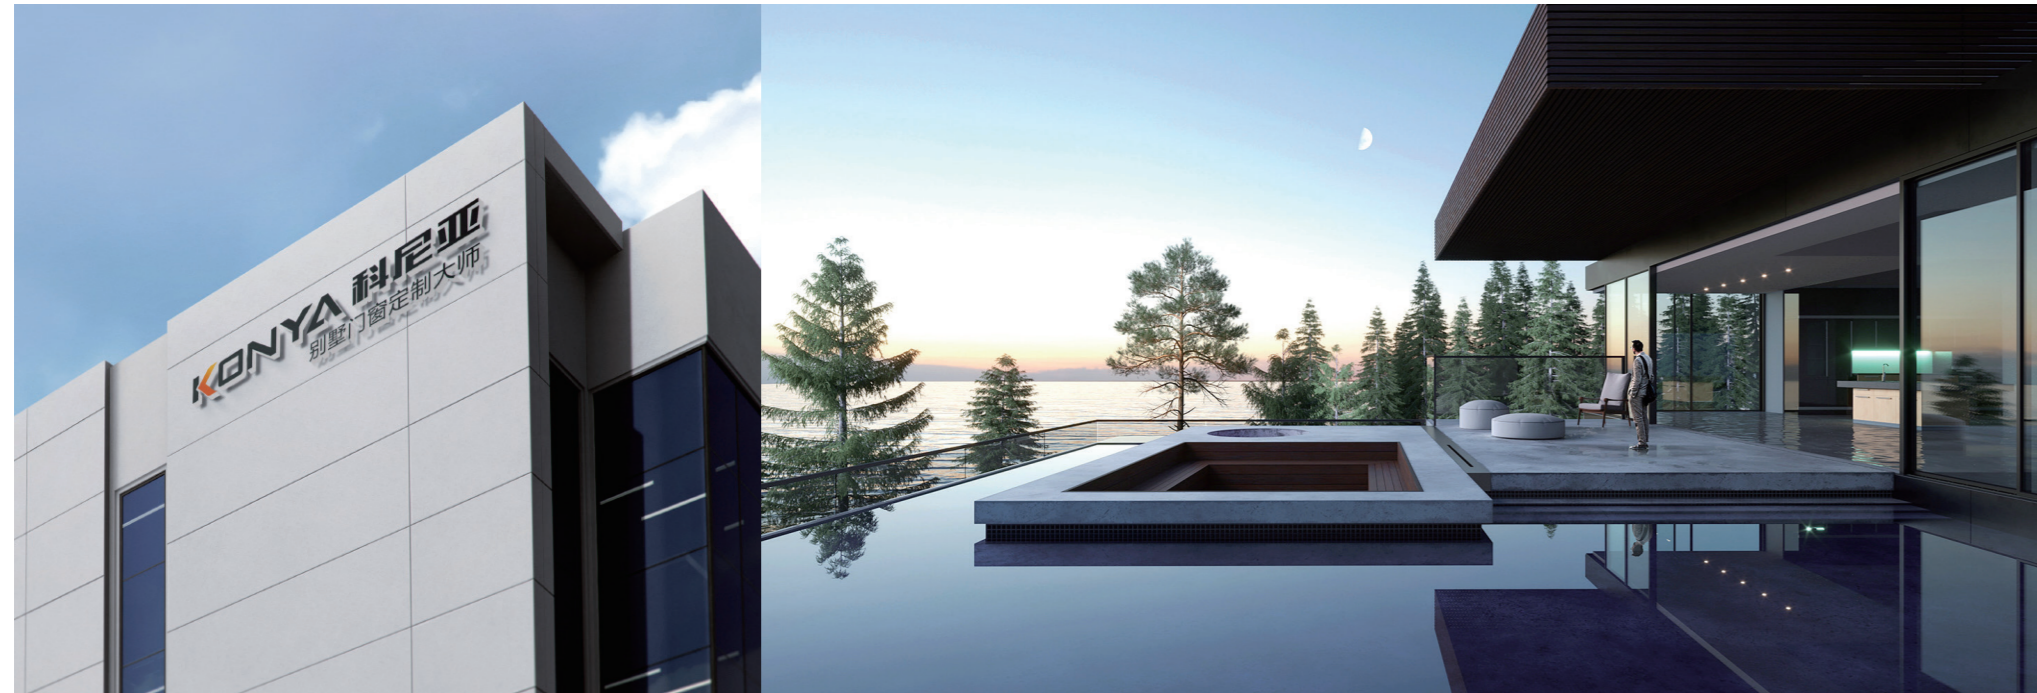

本公司的市场系统研发能力，以产品质量为主导和舒适的服务为前提，开发出合适各个地区的门窗系列产品，采用优质环保节能新型型材，产品风格自然环保，机械性能高、防火性好、抗风压、抗紫外线、耐气候高，气密、水密、隔音、隔热等性能俱佳，铝合金部分采用欧洲设计理念与德国五金配件相结合满足个性化的高要求。以人为本的设计理念，既具有西方新颖风格，高贵而典雅，时尚而大方，又具有东方温馨和雅致。每款产品的精心设计，都蕴含着幸福的意义，为满足各界朋友而创新、开拓，一直肩负着为消费者创造高品质生活的使命。

我们将一如既往地坚守信誉，立足于创新的理念，以质量为本，顾客至上，服务第一的经营宗旨，讲求实效，创立品牌，希望您携手并进，共创美丽和谐的新纪元。

Our company is located in Foshan, Guangdong, the capital of aluminum materials in China. We introduce advanced door and window system technology, high-end imported equipment, senior and professional talents, and mature management experience. We mainly produce and sell mid to high end home accessories. Our products are popular in China and exported to countries such as Africa, the Middle East, Southeast Asia, Europe and America.

Our company's market system research and development capabilities are led by product quality and comfortable services. We have developed a series of door and window products suitable for various regions, using high-quality environmentally friendly and energy-saving new profiles. The product style is natural and environmentally friendly, with high mechanical performance, good fire resistance, wind pressure resistance, external resistance, and climate resistance. The airtightness, water tightness, noise insulation, and other performance are excellent. The aluminum alloy part adopts European design concepts combined with German hardware accessories to meet personalized high requirements. The people-oriented design concept not only embodies the novel Western style, noble and elegant, fashionable and generous, but also has the warmth and elegance of the East. The careful design of each product embodies the meaning of happiness, innovating and exploring to meet the needs of friends from all walks of life, and always shouldering the mission of creating a high-quality life for consumers.

We will continue to uphold our reputation, adhere to the concept of innovation, prioritize quality, prioritize customers, and prioritize service as our business philosophy. We strive for practical results and establish our brand. We hope to work hand in hand with you to create a beautiful and harmonious new era.

SYSTEM SOLUTION

别墅门窗系统解决方案 Villa door and window system solution

现代别墅门窗的设计，更追求框扇简洁化、整体线条化的通透空间感，还需满足通风采光、隔热保温等功能诉求。赋予居者美好人居体验的同时，唤醒其对品质生活的无限想象。

The design of modern villa doors and windows emphasizes the simplicity of frame and fan design, as well as the overall linear and transparent sense of space. It also needs to meet functional requirements such as ventilation, lighting, insulation, and heat preservation. While providing residents with a beautiful living experience, it also awakens their infinite imagination for a quality of life.

安全防护

SAFETY PROTECTION

门窗作为家的第一道防线，承载着守护家居安全的重任。超安全儿童防护装置、超安全防护护角、超安全防夹手设计，还孩子一个安全舒适的成长空间。

As the first line of defense for a home, doors and windows bear the responsibility of safeguarding home safety. The ultra safe child protection device, ultra safe collision angle protector, and ultra safe anti pinch hand design provide a safe and comfortable growth space for children.

节能环保

ENERGY CONSERVATION AND ENVIRONMENTAL PROTECTION

安装性能优越的节能门窗，低碳环保，节能降耗，最大程度降低温差过大的影响，筑造绿色节能的美好生活空间，为家人健康护航。

Install energy-saving doors and windows with superior performance, low-carbon and environmentally friendly, energy-saving and consumption-reducing, minimizing the impact of large temperature differences, building a green and energy-saving living space, and safeguarding the health of family members.

通风采光

VENTILATION AND LIGHTING

空间感与光线明暗息息相关，采用落地窗设计，塑造恢弘大气之感，同时引进充足的自然光。其次，通过“窗型、开窗位置、开启方式”三者配合，为家引入更舒适的通风量。

The sense of space is closely related to the light and darkness. The design of french window is adopted to create a magnificent sense of atmosphere and introduce sufficient natural light. Secondly, by combining the window type, window opening position, and opening method, more comfortable ventilation can be introduced to the home.

隔音降噪

SOUND INSULATION AND NOISE REDUCTION

寻找一处安静栖息是人们对于美好生活的向往。双层夹胶中空玻璃设计，高效降噪 35 分贝，让居者在静谧的环境中，享受自己的一方天地。

Finding a quiet place to live is people's longing for a better life. The double-layer laminated insulated glass design efficiently reduces noise by 35 decibels, allowing residents to enjoy their own space in a quiet environment.

窗型设计

WINDOW DESIGN

想要门窗效果好，合理的开启设计非常重要。开扇数量过多，容易把视线分隔，对整体空间的采光、观景效果造成影响。另外，特色的窗型设计，如转角窗、弧形窗等能为家居带来不一样的观景享受。

A reasonable door and window design is crucial for achieving good results. Too many open fans can easily separate the line of sight, affecting the overall lighting and viewing effect of the space. In addition, unique window designs such as corner windows and curved windows can bring a different viewing experience to homes.

颜值美学

AESTHETICS OF APPEARANCE

无论是新中式之雅致，还是现代风的简约，或是欧式风的轻奢，轻松百搭，迎合不同年龄段用户的审美需要，满足不同装修风格搭配。

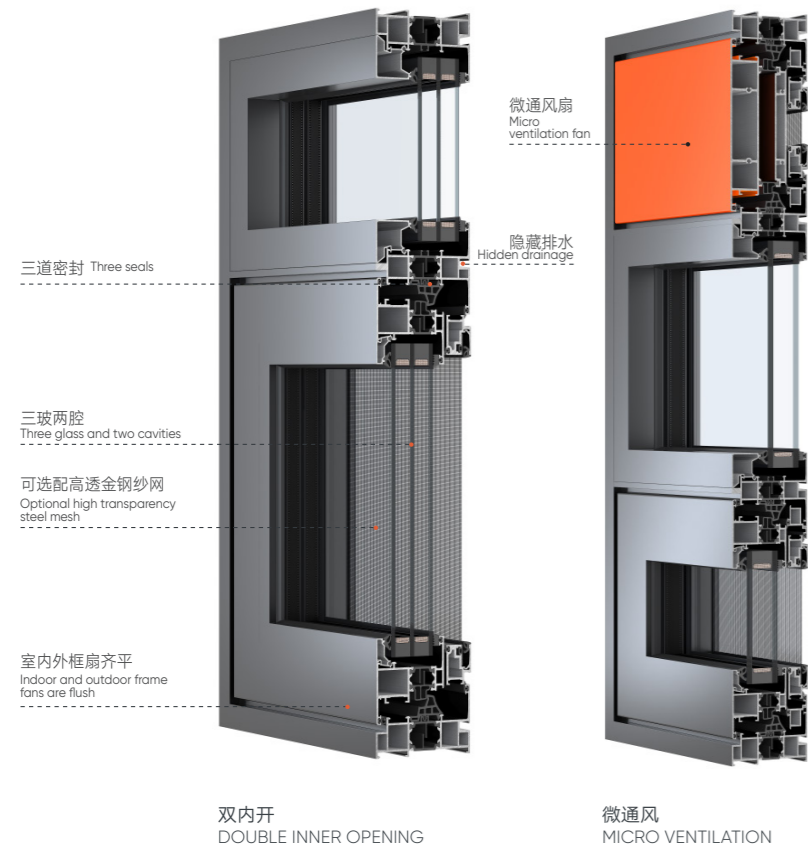

Whether it is the elegance of new Chinese style, the simplicity of modern style, or the light luxury of European style, it is easy and versatile, catering to the aesthetic needs of users of different age groups and meeting the matching of different decoration styles.

科景90 双内开 / 微通风系统窗

KE JING 90
Double inner opening/micro ventilation
system window

产品参数 PRODUCT PARAMETER

边框宽 Border width: 90mm
窗扇 casement: 72mm
玻璃配置 Glass configuration: 5mm+20A+5mm

型材壁厚 Profile wall thickness: 2.0mm
隔热条 Insulation strip: PA66GF25 尼龙隔热条

产品特点 PRODUCT SELLING POINTS

01. 框扇多腔体加强筋结构, 坚固抗风压;
 02. 内外平框, 销钉注胶工艺;
 03. 多腔体复合型 PA66GF25 隔热穿条, 结构稳固, 有效降低导热系数;
 04. 标配超宽 EPDM 等压胶条, 杜绝雨水反渗;
 05. 专属反勾式防脱压线, 玻璃稳如泰山, 抗风压性更强;
 07. 标配 R 型倒角工艺·安全防护。
01. The multi cavity reinforced rib structure of the frame fan is sturdy and resistant to wind pressure;
02. Inner and outer flat frames, pin injection molding process;
03. Multi cavity composite PA66GF25 insulation strip, stable structure, effectively reducing thermal conductivity;
04. Equipped with ultra wide EPDM equal pressure adhesive strips as standard to prevent rainwater backflow;
05. The exclusive anti hooking anti drop line makes the glass as stable as Mount Tai and has stronger wind pressure resistance;
07. Standard R-shaped chamfering process for safety and collision prevention.

地漏式排水

FLOOR DRAIN DRAINAGE

地漏式设计，保证了水密性和气密性的同时，有效排出雨水，防止倒灌。

The floor drain design ensures water and air tightness while effectively draining rainwater and preventing backflow.

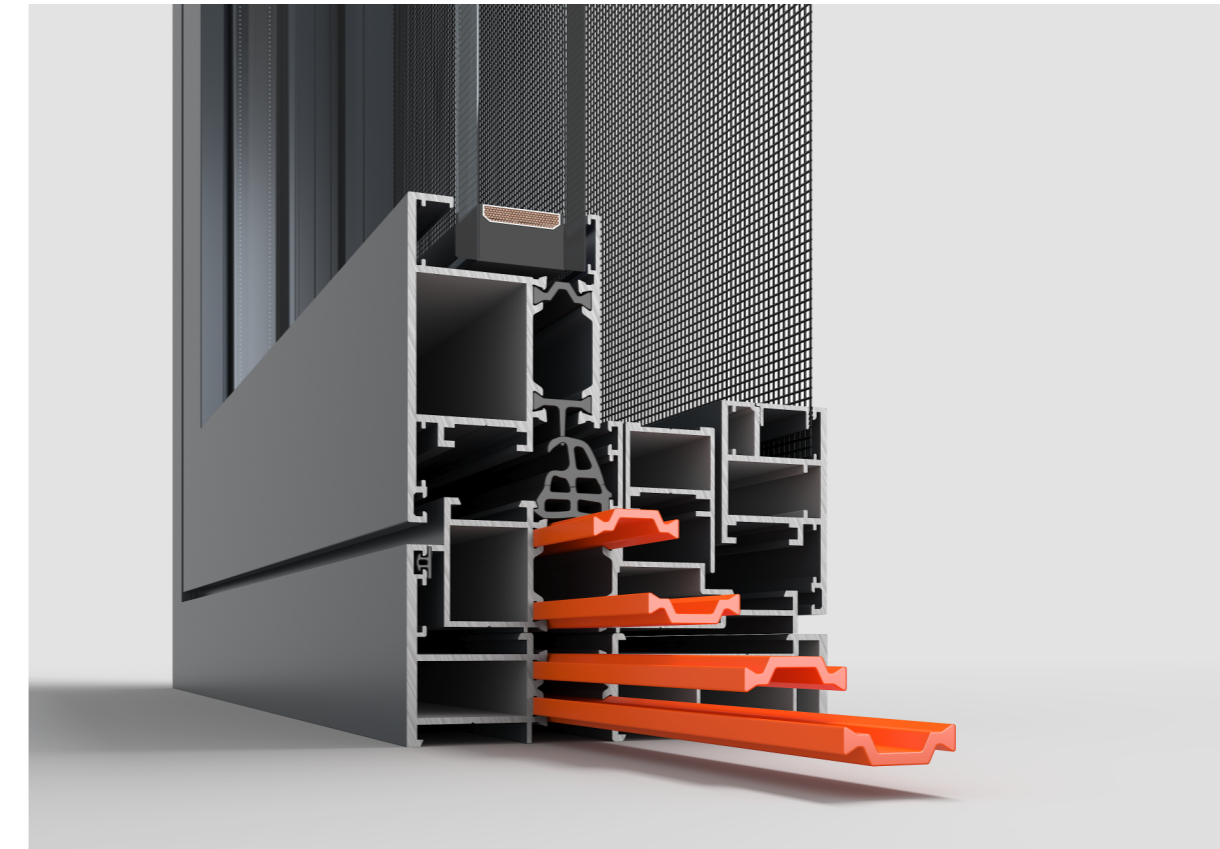

杜绝风啸

Eliminate wind howling

排水顺畅

Smooth drainage

垂直等温线设计

隔热堡温

VERTICAL ISOTHERM DESIGN INSULATION TEMPERATURE

对齐等温线结构设计，标配内置隔热棉隔热保温性能更优异。

密封位置、腔体设计与节能玻璃之间采用了辐射传导、对流传导、材料直接传导系数，结合最科学的等温直线式平衡，提升保温性能，降低门窗与建筑物的整体能耗，节能环保。

Aligning the isotherm structure design, equipped with built-in insulation cotton for better insulation performance as standard. The sealing position, cavity design, and energy-saving glass adopt radiation conduction, convection conduction, and material direct conductivity coefficient, combined with the most scientific isothermal linear balance improves insulation performance, reduces overall energy consumption of doors, windows, and buildings, and is energy-saving and environmentally friendly.

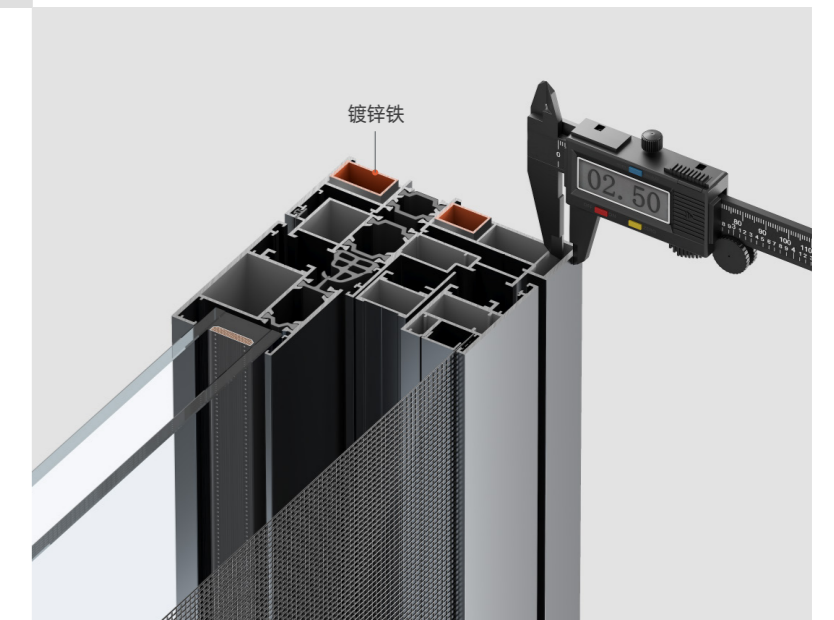

超国标壁厚

WALL THICKNESS EXCEEDING NATIONAL STANDARD

使用超新国标的 2.5mm 主型材壁厚宇航级材料，好材更耐用，成就了坚固高质量的框体架构

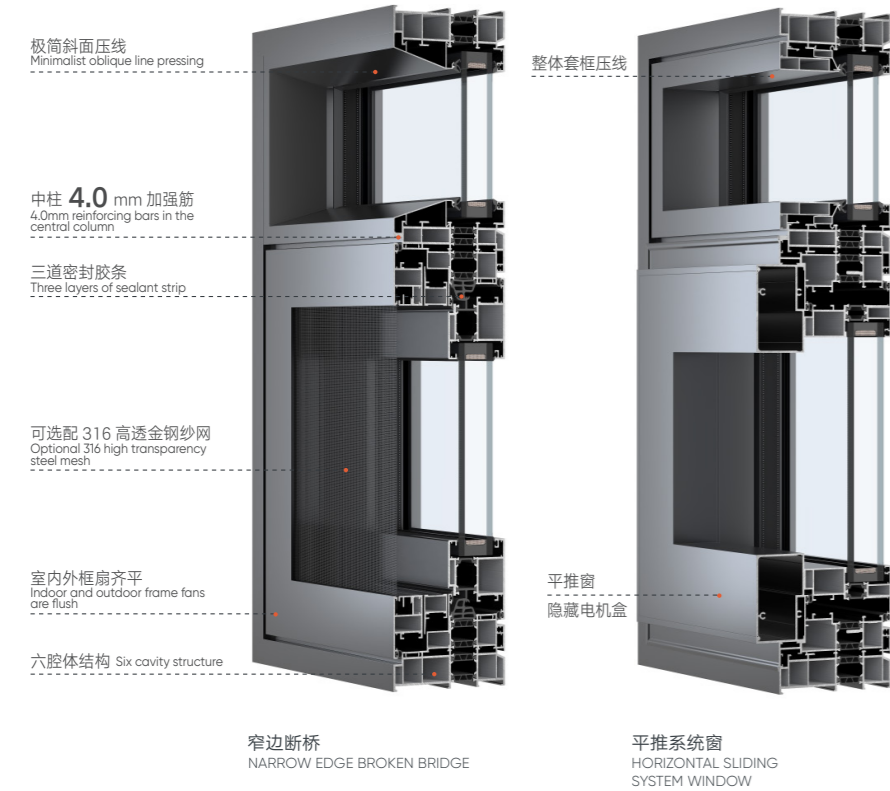

Using the latest national standard 2.5mm main profile wall thick aerospace electrode materials, better materials are more durable, achieving a sturdy and high-quality frame structure

集成护栏一体的内开 纱窗方案

INTEGRATED GUARDRAIL INTEGRATED INTERNAL OPENING
SCREEN WINDOW SCHEME

整合进系统的玻璃护栏天衣无缝地融入产品之中满足落地窗式开启单元的防护标准要求和符合人性化的护手设计，同时集成了向内开启的高透型防蚊纱窗。这些创新结构组成让矛与盾统一起来令人在享受便利的同时又不受任何阻碍与困扰

The glass barrier integrated into the system is seamlessly integrated into the product to meet the floor window opening protection standards for the starting unit and the humanized hand protection design are required, while integrated with a high transparency mosquito screen window that opens inward. These innovative structures unify the spear and shield, allowing for convenience without any obstacles or troubles

新一代平移侧压 重新定义“平移压紧窗”

NEW GENERATION TRANSLATIONAL LATERAL PRESSURE REDEFINING
"TRANSLATIONAL COMPRESSION WINDOW"

勾企了组和边框了组锁点锁座牢牢地扣在一起与联动五金配合共同产生密封压紧力使扇、框之间形成 360°无死角密封，高达 RC2 级防盗。

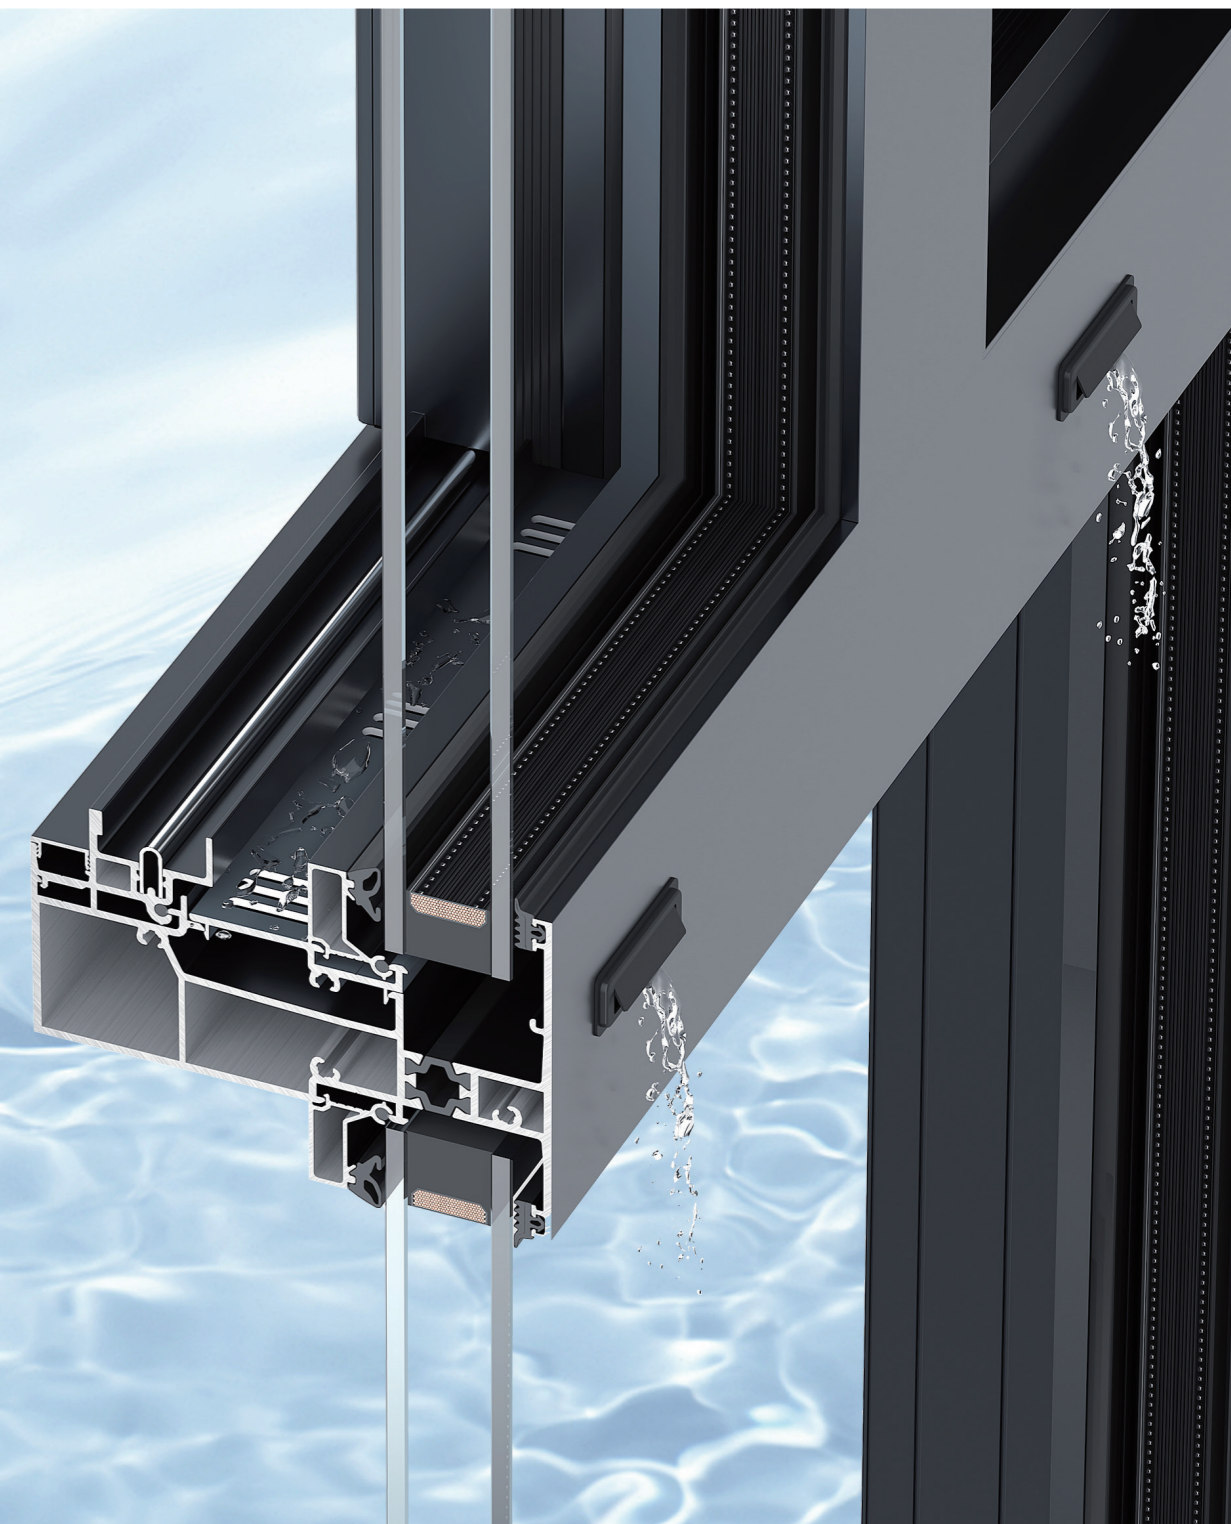

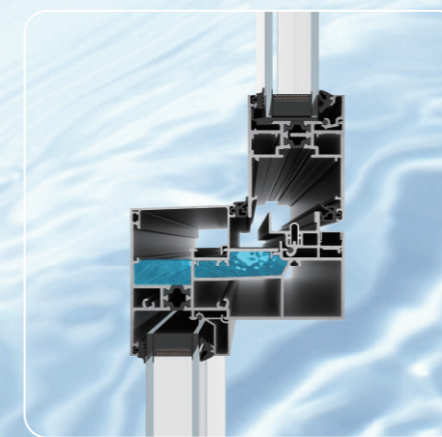

Checked the group and border, securely fastened the group locking point and lock seat together. The linkage hardware cooperates to jointly generate sealing and compression force, forming a 360° non dead angle seal between the fan and frame, achieving up to RC2 level anti-theft.

地漏式排水设计

FLOOR DRAIN DRAINAGE DESIGN

扇框密封区域多达九道密封毛条，通过底部及内外侧的三个维度层层看合以此遏制轨道与下方的空气对流。轨道中央的 PVC 隔热槽形成垂直保温线带来稳定的断面构造，从而进一步改善整窗的热工性能。PVC 槽面设有纵向连续的条状排水孔，减少轨道表面积水量，即使暴雨天也能拥有优秀排水能力。

There are up to nine sealing strips in the sealing area of the fan frame, which are checked layer by layer through the three dimensions of the bottom and inner and outer sides to contain it. Convection between the track and the air below. The PVC insulation groove in the center of the track forms a vertical insulation line, bringing stable cross-sectional structure. Thereby further improving the thermal performance of the entire window. The PVC groove surface is equipped with longitudinal continuous strip shaped drainage holes. Reduce the amount of water on the track surface, so that it can have excellent drainage capacity even in rainstorm days.

智能电动圈帘
ELECTRIC RING CURTAIN

电动卷帘是采用管状电机为动力的一种电动化卷帘。它智能遥控操作简便、工作安静平稳，卷管为优质铝合金材料，表面进行阳极氧化处理，防老化、耐腐蚀强度高，且不易变形；保证安装使用的安全可靠。

Electric roller blind is a type of electrified roller blind that uses a tubular motor as the power source. It has intelligent remote control for easy operation, quiet and stable operation. The coil is made of high-quality aluminum alloy material and has undergone anodizing treatment on the surface. Anti aging, high corrosion resistance, and not easily deformed. Ensure the safety and reliability of installation and use.

多重密封框架

MULTIPLE SEALING FRAMES

牢靠坚固·安全美观，框包扇结构，多重胶条紧贴扇框固定扇设计
适配防滑门槛扣盖更平整美观。

Reliable, sturdy, safe and beautiful, with a frame wrapped fan structure and multiple adhesive strips tightly attached to the fan frame to fix the fan design. Adapted to anti-skid threshold buckle for a smoother and more aesthetically pleasing appearance.

集成式排水轨道

INTEGRATED DRAINAGE TRACK

层层过滤·排水流畅，连贯的双层过滤盖有效防止倒灌。通长设置的排水孔增强水密性能。

Layer by layer filtration and smooth drainage, the continuous double-layer filter cover effectively prevents backflow and enhances water tightness through the drainage holes set up throughout.

新耀138 全景推拉门

XINYAO 138
Panoramic sliding door

4道

密封完全断热和密封设计
4 seals completely cut off heat and seal design

可视面仅 14 mm
Visible surface only 14mm
美观与纤薄共存

隐排水槽 Hidden drainage tank

零水平高度差预埋型轨道型材
Zero horizontal height difference pre embedded track profile
提升用户的舒适度和门槛的水密性
Improve user comfort and water tightness of threshold

产品可配置 PRODUCT CONFIGURABLE

新耀 138 提供了众多基础开启类型，如一固一活、三扇活动、三轨多扇带纱窗等满足绝大部分的项目应用。
The Xinyao 138 provides numerous basic opening types, such as one fixed and one active, three active, three track and multiple screen windows, to meet the vast majority of project applications.

产品参数

PRODUCT PARAMETER

边框宽 Border width: 两轨 Two tracks 138 / 三轨 Three tracks 206mm
窗扇 casement: 50mm
玻璃配置 Glass configuration: 6mm+24A+6mm
型材壁厚 Profile wall thickness: 3.0mm
隔热条 Insulation strip: 39.34T 型尼龙隔热条

产品卖点

PRODUCT SELLING POINTS

01. 隐排水设计，排水顺畅、外形美观；
 02. 整框等温线垂直设计，开启位置三道密封，性能与颜值兼优；
 03. 框扇齐平外观，室内外都齐平，简洁大气，更美观；
01. Hidden drainage design, smooth drainage and beautiful appearance;
02. The entire frame is designed with a vertical isotherm, with three seals at the opening position, providing excellent performance and appearance;
03. The appearance of the frame fan is flush, both indoors and outdoors are flush, simple and atmospheric, and more aesthetically pleasing;

新一代全景门五金件

NEW GENERATION PANORAMIC DOOR HARDWARE

系统历经几代变革线条更极致，产品更纤薄，性能更优异不断的迭代只为适应更多的需求变化和可能性外观、性能、加工与应用等诸多核心需求进行全方位优化融合了高端性能和出色成本

The system has undergone several generations of transformation, with more extreme lines, thinner products, and superior performance. Continuous product iteration is only aimed at adapting to more demand changes and possibilities. It comprehensively optimizes many core requirements such as appearance, performance, processing, and application, integrating high-end performance and excellent cost.

独特线型轨道

UNIQUE LINEAR TRACK

线型轨道，让大型推拉窗在高层建筑实现新的可能 -- 全景推拉窗与大跨度固定窗合二为一。
Linear track allows for new possibilities for large sliding windows in high-rise buildings - combining panoramic sliding windows with large-span fixed windows.

可做无立柱转角

CAN BE USED FOR TURNING CORNERS WITHOUT PILLARS

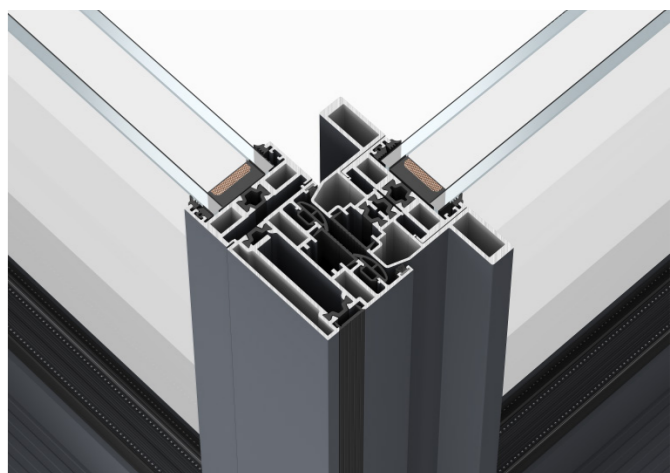

矮线轨 - 预埋线型轨道

LOW TRACK - EMBEDDED TYPE TRACK

在完整部署排水渠的前提下，可呈现半预埋完全预埋状态，平齐衔接室内外地面并且为大型过道门提供极高的水密性能。

Under the premise of fully deploying drainage channels, it can present a semi-embedded and fully-embedded system. Pre-embedded state, flush connecting indoor and outdoor floors, and providing extremely high water tightness performance for large passage doors.

空间给人的治愈，
最终也将反馈于空间之中。
空间与人的互动，
将成为一个良性循环、
奇妙自在的诗性场域。

The healing that space provides,
Ultimately, it will also be fed back into the space.
The interaction between space and people,
It will become a virtuous cycle
A wonderful and free poetic realm.

新幕智能全景提升窗

New screen intelligent panoramic lifting window

采用上活动下固定设计，开窗面积可达 50%
超大玻璃可打造 180°大视野，让阳光和新鲜空气，
最大限度地渗进生活空间将窗外
美景最大化收纳进室内，且整个阳台不占空间。

Adopting a fixed design with upper activity and lower fixation, the window area can reach 50%. The oversized glass can create a 180° field of view, allowing for sunlight and fresh air. Maximize infiltration into living spaces and bring out the windows. Maximize the storage of beautiful scenery indoors, and the entire balcony does not take up space.

塞纳平移天窗无缝焊接

Seamless welding of Senna sliding sunroof

采用平移天窗开启方式，电动平移天窗效果显著换气面积大，响应速度快、30s 内可以实现完全打开；大面积电动平移天窗阻尼缓冲，配置组尼结构，实现电动遥控启闭，手动开关开启时特别是天窗自动开启时阻尼缓冲，防止天窗损坏；独特的结构设计防水设计，铝合金焊接技术确保不漏水；通风效果更好，隔音更好。

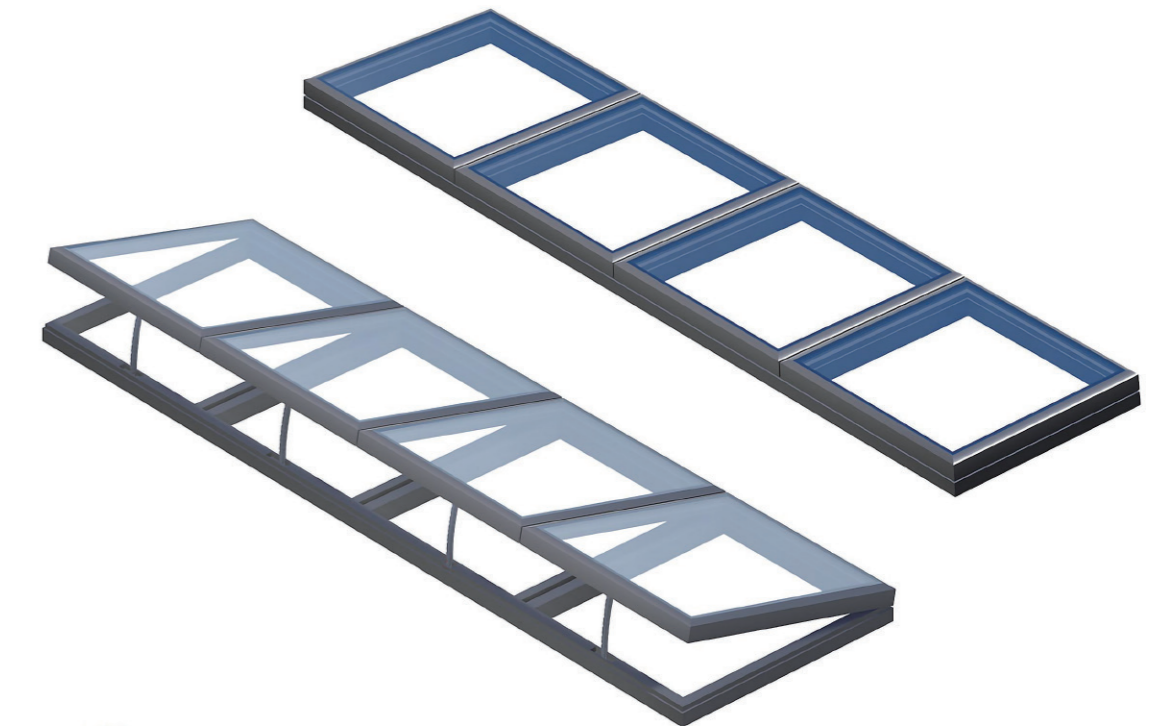

By using the sliding sunroof opening method, the electric sliding sunroof has a significant air exchange area, fast response speed, and can be fully opened within 30 seconds. Large area electric sliding sunroof damping buffer, equipped with a modular structure to achieve electric remote control opening and closing. Damping buffer is used when manually opening the switch, especially when the sunroof is automatically opened, to prevent damage to the sunroof. Unique structural design with waterproof design and aluminum alloy welding technology to ensure no water leakage; Better ventilation and sound insulation.

塞纳上悬天窗无缝焊接

Seamless welding of Senna suspended skylight

采用上悬的开启方式，有利于改善室内热舒适度改善阴暗潮湿的室内环境，带来健康舒适感；高品质铝合金天窗专用型材，良好的保温、隔热性能，固定、开启外观精致，简约大方；无缝焊接防水体系，能够轻松应对极端天气，增强水密性、保温隔热，节能性更好；天窗型材经过可行性研究，不同的体积、厚度、表面、机械特性、耐用及耐受性……确保承重性、抗风性、抗雪性和耐火性；智能控制，可接智能家居系统、语音控制、手机远程遥控、雨水感应等。

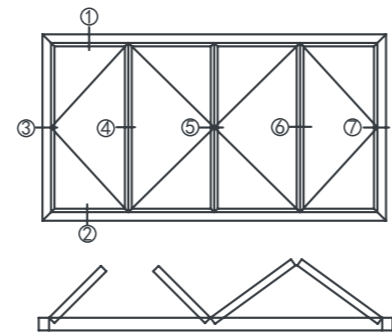

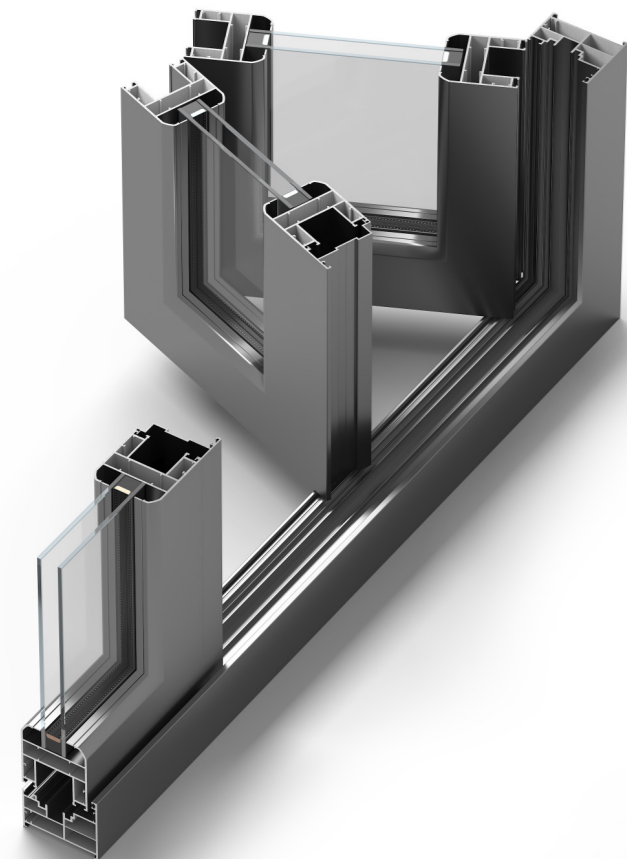

Adopting an upward hanging opening method is beneficial for improving indoor thermal comfort, improving dark and humid indoor environments, and bringing a sense of health and comfort. High quality aluminum alloy skylight special profiles, with good insulation and heat insulation performance, exquisite fixed and open appearance, simple and elegant; Seamless welding waterproof system, able to easily cope with extreme weather, enhance water tightness, insulation, and better energy efficiency; The skylight profile has undergone feasibility studies, ensuring load-bearing, wind resistance, snow resistance, and fire resistance with different volumes, thicknesses, surfaces, mechanical properties, durability, and tolerance; Intelligent control, capable of connecting to smart home systems, voice control, mobile remote control, rain sensing, etc.

新致75 重型折叠门
